## Mutual cooperation within the educational project

**Application number:**

EHP-CZ-PRV-1-001

**Beneficiary:**

Technical secondary school,  
Most, Czech Republic

**Partner organisation:**

KREATIVT GJENBRUKSSENTER I SALTEN AS  
Bodø, Norway

**Term of the visit:**

January 20, 2020 - January 23, 2020

**Approved grant:**

53 750 CZK

**Summary:**

The preparatory visit was very beneficial and exceeded our expectations. When searching for a potential partner, we looked for possible contacts via the Internet and personal experience of colleagues from other schools in our region who had already worked with Norway. We got an e-mail contact of a representative of the educational center KREATIVT GJENBRUKSSENTER I SALTEN AS which we later contacted with a request for po-

tential cooperation. The possibility of personal contact and discussions when the planning project activities was undoubtedly very beneficial. The planned activities, the concrete fulfillment of our ideas about the work of the selected partner (with illustrative examples of their work with the target group), the professionalism of the participants and their experience with the implementation of projects brought such results that we could not achieve through emails only. Unexpected for us was also the opportunity to cooperate with the local university - NORD University in Bodø which, among other things, focuses on environmental policy. We agreed on future cooperation which we are very much looking forward to. Based on our experience from the preparatory visit, willingness, professionalism and enthusiasm of the representatives of the donor state, we would certainly recommend similar cooperation to other schools.

**The cooperation continues within the project  
*Ecology Squared* (EHP-CZ-ICP-2-021)**

## Ready to begin

**Application number:**

EHP-CZ-PRV-1-002

**Beneficiary:**

Secondary nursing school and Tertiary vocational nursing school

Liberec , Czech Republic

**Partner organisation:**

Johan Bojer upper secondary school

Leksvik, Norway

Steinkjer upper secondary school

Steinkjer, Norway

**Term of the visit:**

January 19, 2020 - January 23, 2020

**Approved grant:**

31 875 CZK

**Summary:**

At the contact seminar, I preliminarily agreed with two colleagues from Norway on possible future cooperation. During the subsequent preparatory visit to Norway, I had the opportunity to meet other colleagues who intended to be involved in the project and the places - institutions, workplaces - where the pro-

jects will take place. After meeting with colleagues in person, we partially changed the goals and content of the originally planned projects - we adapted them to the possibilities of all the participants. I received maximum support from the partners and the cooperation resulted in two project applications (mobility project and VET project). Our school will benefit not only from the exchange of participants' experience in the field of health care, but also from their acquaintance with the cultural and social environment of the partner, including the increase in their language competencies. I would definitely recommend cooperation with partners from Norway to other Czech schools.

**The cooperation continues within the project *Safe Ageing* (EHP-CZ-VETP-2-001)**

## EEA - Eager Entrepreneurs Abroad

**Application number:**

EHP-CZ-PRV-1-003

**Beneficiary:**

Business High School  
Prague, Czech Republic

**Partner organisation:**

Thora Storm upper secondary school  
Trondheim, Norway

**Term of the visit:**

February 2, 2020 - February 4, 2020

**Approved grant:**

21 875 CZK

**Summary:**

The idea of this project started in October 2019 when both partners met at the contact seminar for the EEA Grants in Prague. Consequently, the project got a more concrete shape thanks to the preparatory visit that took place in Trondheim in February 2020. Both schools expressed their willingness to continue in cooperation giving a chance to their students to broaden their cultural and professional knowledge.

The preparatory visit was successful and it met all our expectations. Both parties had fruitful discussions and developed concrete ideas and details of the project. They had to clarify their capacities (the number of involved students and accompanying teachers) and they also agreed on the final dates of the project. Also thanks to DZS, both parties were able to finalize all the parts of the application that were unclear. Finally, the future cooperation was set and the project applications were successfully submitted.

The cooperation with the Norwegian school was productive and much appreciated. It is highly recommended to cooperate with Norwegian schools due to their professional and proactive approach.

**The cooperation continues within two projects:  
*EEA - Eager Entrepreneurs Abroad (EHP-CZ-MOP-2-019) and EEA - Educators' Entrepreneurial Adventure (EHP-CZ-VETP-2-004)***
